# [Sf=ir] Institute

SFEIR Institute, SFEIR Institute | VUEJS

## Vue.js

2jours/14h

## Target audience

- Master the key architectural concepts of Vue.js
- Develop the graphical interface for complete web or single page applications with Vue.js
- Implement the development tools specific to Vue.js
- Implement major Vue.js plugins

### Prerequisites

Developers, integrators, software architects, technical project managers

### Course Outline

1, Introduction to Vue.js

- Principles and philosophy
- Comparison with other major frameworks
- Roadmap
- Vue.js Installer

#### Workshops

- Vue.js installation
- Quick win: getting started with Vue.js

#### 2. Core Library

- o Instance, life cycle and properties
- Reactivity
- Template
- Directives
- Workshops:
- Implementation reactive properties
- o Use of directives: conditionals, lists, events, model, style
- o React to the life cycle of the Vue instance

#### 3. Components

- Definition
- Component Registration
- Props
- o Template, slots
- Tree structure and communication between components
- Dynamic components
- Animations and transitions

#### Workshops:

- Creation of a single view using several custom components
- 4. Reusability and Composition
  - Mixins
  - Filters
  - Plugins

#### Workshops:

- Creation and use of mixins, filters and plugins
- 5. Tools
  - o Vetur, VSCode client
  - o Devtools, browser plugin
  - ∘ Vue CLI, RAD console
  - TypeScript

#### Workshops:

- Implementation of a complete development environment
- 6. Single View Components

- Single File Components
- o Different ways to create a SFC

#### Workshops:

- Create a Single File Component
- 7. Vue Router library
  - Principles
  - Installation
  - Router access
  - o Features: dynamic, nested, programmatic navigation ...
  - Navigation Guards

#### Workshops:

- Creation of a Single Page Application with Router
- 8. Vuex
  - o Application Structure and State Management Pattern
  - Installation
  - Implementation
  - Alternative Libraries

#### Workshops:

• Centralized state management of an application using Vuex
