

PWA – Progressive Web Applications

2jours / 14h

Target audience

- Understanding and manipulation of the concepts associated with PWAs.
- Handling PWAs debugging tools

Prerequisites

Developers, integrators, software architects, technical project managers

Course Outline

- This course assumes that you already have the basics of web application programming (ES6).
- Basic knowledge of Git
- Front-end development with NPM
- Install nodejs (LTS): <https://nodejs.org/>
- Install git: <http://git-scm.com/>
- Your favorite editor (we recommend Visual Studio Code)
- Install Chrome and at least one other up-to-date browser (Edge, Safari, Firefox)
